

Ahoy!

My name is Homo erectus, and I am one of the hominins. I have many famous fossils, such as Java man, Peking man, and the Turkana boy, which is the most complete fossil set of my species. I was fully bipedal and made advancements on my tools. I also mastered fire, and was a social creature. I enjoyed meat, tubers, and honey in my diet. I also have a larger brain than earlier hominins. Speaking of which, make sure to check out the other hominins!
